Protecting Email Privacy

For security and privacy reasons, it is important to use the Blind Carbon Copy (BCC) feature when sending an email message to a large number of people.

When you place email addresses in the BCC field of a message, those addresses are invisible to the recipients of the email. Conversely, any email addresses that you place in the To field or the CC field are visible to everyone who receives the message.

Benefits of Using BCC

Using the BCC field to send an email message to a large group of people has a number of benefits, including:

- ☐ The privacy of email addresses is protected in the original message. Recipients will receive the message but won't be able to see the addresses listed in the BCC field.
- ☐ When an email is forwarded, the addresses of everyone in the To and CC fields are also forwarded along with the message. Addresses that have been placed in the BCC field are not forwarded.
- ☐ If you have placed a large list of recipients in the To or CC field, all of them will receive the reply. By placing recipients in the BCC field, you can help protect them against receiving unnecessary replies from anyone using the Reply All feature.
- ☐ Many viruses and spam programs are now able to sift through mail files and address books for email addresses. Using the BCC field acts as an anti spam precaution. It reduces the likelihood that recipients will receive a spam message or a virus from another recipient's infected computer.

We are reviving some of our pre-Covid events. In early May, I hosted a coffee & donuts morning social which was very well attended. On Wednesday, June 29, Mary Alice Doyle has graciously agreed to host a wine and snacks get together at 6:30 in the evening. I would love to hear from anyone who would be willing to host one of these socials. Two neighbors could also join in having one. Any assistance necessary would gladly be provided.

South Abington Park Installs Circuit Stationary Fitness Equipment

In an effort to include more fitness options for healthy activities, South Abington Twp Parks, Recreation and Shade Tree Commission has installed four new pieces of stationary fitness equipment in the park.

Located just off the walking path, along the treeline of the upper portion of the park, above the splash pad, a Sit-Up Bench, Horizontal Bars, Parallel Bars, and Multi Bars stationary equipment has been installed and is ready for the community's use. "It was an important project for me, as physical fitness and muscular strength is important for us all to maintain for our physical and mental health," says Keri Anders, project lead: South Abington Twp Parks, Recreation and Shade Tree Commission Member.

Funded in part by a donation from the Abington Senior Center and the 2019 Park's Budget, the equipment installation project has totaled \$6,141.00. The four pieces of equipment are manufactured by TriActive, made in the USA, and designed and manufactured with functionality and durability in mind; able to withstand our four-season weather. "So many people enjoy walking at our park, and since this equipment can be used by all ages we want to give the community a chance for something new to motivate them to reach their goals," continued Anders.

South Abington Park is located at 642 Northern Blvd, adjacent to the South Abington Elementary School. The park includes athletic fields, basketball courts, pickleball courts, children's splash pad, children's playgrounds, and a paved walking trail taking you throughout the park's total footprint.
